Course Outline:

The Ellerslie Academy Program is now an open program for Ellerslie players that display promise to become more skilled footballers in the future.

The players will learn a variety of skills that will make them successful footballers as they become older. It will focus on the 4 habits of successful players that have been identified by New Zealand Football. These 4 habits are the same criteria that New Zealand Football uses to select its elite players for its national training programs.

The Academy Program will develop these skills in our players, a stronger confidence on the ball and maintain that love for the game which is extremely important. The Academy Program's focus is to prepare Ellerslie's Junior and Youth players with the right toolset to become future stars of the game. This course will be run by experienced coaches who have been up-skilled to train players in these specific areas.
