Course Outline:

The Ellerslie AFC Academy Programme is a programme open to all Ellerslie players that display promise to become more skilled footballers in the future.

The players will learn a variety of skills that will help them become successful footballers as they get older. It will focus on the four habits of successful players that have been identified by New Zealand Football. These four habits are the same criteria that New Zealand Football uses to select its elite players for its national training programmes.

The Academy Programme will develop these skills in our players, a stronger confidence on the ball and maintain that love for the game, which is extremely important. The Academy Programme's focus is to prepare Ellerslie's Junior and Youth players with the right tools to become future stars of the game. This course will be run by experienced coaches who have been up-skilled to train players in these specific areas.
